A	Initial release of document.

Bionano Label Density Calculator

This document describes the v1.0 release of Bionano Label Density Calculator. In this document we will provide an overview of what is changing with this release so that you may better understand the impact of moving to this version of our software. Should you have any questions please contact support@bionanogenomics.com.

Introduction

The Bionano Label Density Calculator predicts the expected label density from sequence FASTA files. This is a completely new version of the program. Any previous versions should be uninstalled.

New Features

This version of the Bionano Label Density Calculator has been re-written from the ground up. It is using a novel platform called [electronjs](#) which allows [nodejs](#) programs to run as windows applications. This new version is much more visually pleasing and **it has been modified to properly predict label density for DLS enzymes in addition to nicking enzymes.**

Technical Assistance

For technical assistance, contact Bionano Genomics Technical Support.

You can retrieve documentation on Bionano products, SDS's, certificates of analysis, frequently asked questions, and other related documents from the Support website or by request through e-mail and telephone.
